

# It's easy to manage group enrollment and eligibility

---

Easy, convenient group health plan management is available from Aspirus Arise. You get a comprehensive electronic eligibility file feed process that empowers you to manage the enrollment of employees and dependents, change demographic information, terminate or re-enroll employees, and change coverage for existing employees. You can access this functionality when you log in to your online account at [AspirusArise.com](http://AspirusArise.com).

## Flexible options

You have the ability to upload full files or change files at any time, even during Open Enrollment. Microsoft Excel® files or text file types are accepted. You can create employer-specific eligibility edits. Plus, COBRA eligibility can still be handled outside of this process.

## Save time and money

You can create and send files right from your Human Resources or Payroll system. You don't have to fax, mail, or use secure online messaging to send your files. They can even be automatically triggered to send daily or weekly.

## Secure file transmission

Your files are transferred through a secure EDI transmission process. The files you send are transmitted directly into the Aspirus Arise eligibility system for efficient updating.
